

What's your gut feeling

about IBD clinical practice today and tomorrow?

Interactive case-based discussions

Friday 16th February 2018, 12:40–13:20

Lunchtime satellite symposium LS2

Hall C, Parallel Hall

Chair: Jean-Frédéric Colombel

This programme is not affiliated with ECCO

Lunch will be provided

January 2018 INT-OZA170026h

We are delighted to invite you to the Celgene-sponsored symposium at ECCO 2018 in Vienna, to explore your gut feeling about the future of clinical practice in IBD.

Despite the progress in IBD management that the use of biological therapies has provided, limited efficacy, safety concerns and poor durability mean that most patients still experience a reduced quality of life, and many require surgery.¹ However, as new compounds progress through clinical development, it is likely that physicians will have an increasing number of therapeutic options to choose from.² As such, the time is right to examine current treatment strategies and mobilise the community to start shaping the paradigm of future IBD treatment.

In this symposium, discussions will centre around two case studies that exemplify challenges faced in managing ulcerative colitis and Crohn's disease. As the panel delves into what drives current decision-making and therapy selection, you will have the opportunity to contribute to discussions in real time through our interactive voting system.

Please join us and add your voice to the conversation.

12:40

Welcome and introduction

Jean-Frédéric Colombel (New York City, USA)

12:45

**Case study 1:
Current and future approaches
to the management of mild-to-moderate
ulcerative colitis**

Panel discussion with:

Jean-Frédéric Colombel (New York City, USA)

Edouard Louis (Liège, Belgium)

Remo Panaccione (Calgary, Canada)

13:00

**Case study 2:
Current and future approaches
to the management of moderate-to-severe
Crohn's disease**

Panel discussion with:

Jean-Frédéric Colombel (New York City, USA)

Edouard Louis (Liège, Belgium)

Remo Panaccione (Calgary, Canada)

13:15

Closing remarks

Jean-Frédéric Colombel (New York City, USA)
