# WELCOME FROM THE CHAIR

---

Dear colleagues

It gives me great pleasure to invite you to the “Amgen Biosimilars” sponsored educational symposium **‘The IBD management puzzle: do we have all the pieces?’** at the 14<sup>th</sup> Congress of the European Crohn’s and Colitis Organisation.

We are entering an exciting era in the management of IBD, with optimisation of existing therapies and new strategies being explored that have the potential to further improve patient outcomes. A growing recognition of the value of a personalised approach to treatment will bring us to individual diagnostic and therapy concepts. With a faculty from Germany, Austria and Italy, we will provide you with expert opinions on current hot topics in IBD – optimal approaches to using biologic therapy, and the use of therapeutic drug monitoring and biomarkers in treatment management. Our meeting format will be highly interactive to give you maximum opportunities for participation, to join in the discussions and to ask the questions that are important to you.

We look forward to welcoming you in Copenhagen for what promises to be a highly informative and engaging symposium.

A handwritten signature in blue ink that reads "Stefan Schreiber".

**Professor Stefan Schreiber**

Schleswig-Holstein,  
Kiel, Germany

# AGENDA

---

**Chair:**

**Stefan Schreiber**

**18:45–18:50**

Welcome and introduction

**Stefan Schreiber**

(Kiel, Germany)

**18:50–19:05**

Putting the pieces together: when should anti-TNFs be introduced?

**Stefan Schreiber**

**19:05–19:20**

Solving the riddle: how do we implement TDM to maximise treatment success?

**Walter Reinisch**

(Vienna, Austria)

**19:20–19:35**

Unravelling the problem: how can biomarkers be used to guide clinical management?

**Gionata Fiorino**

(Milan, Italy)

**19:35–19:45**

Summary and close

**Stefan Schreiber**
