About ECCO

Mission Statement

ECCO will strive for an optimisation of care for patients with IBD in all aspects.

As part of this mission ECCO will adopt and further all efforts that lead to an improvement of the use of current therapies and procedures. Main aims include the development of guidelines with highest possible methodology and content quality and joint efforts to define better and more valid outcome parameters for the therapy of IBD.

Further aspects of the mission include the promotion of specialist, postgraduate education in IBD and the promotion of scientific projects in IBD. Such promotion can include intellectual input, funding and joint training using an ECCO defined curriculum. ECCO's visibility will be always as an organisation and not as the individuals making up ECCO. With all its activities the name of ECCO will stand in the world of gastroenterology for the highest possible level in quality and full impartiality in the results.

E-QUALITY

ECCO Quality of Care Project

Project Framework:

- Intended to ultimately improve the quality of care of patients living with IBD
- Building on the ECCO Position Statement on Quality of Care Standards in IBD and the UR-CARE database
- First step: Identifying gaps between quality standards as defined by ECCO Statements and current practice in daily clinical care
- Second step: Fill the identified gaps with educational tools and/or activities
- Quality standards identified in three main domains: Structure, Process and Outcomes

Keep an eye on the first results to come!

Scientific Programme

"Sequencing in IBD"

The Scientific Programme of the 18th Congress of ECCO provides attendees the unique opportunity to learn from the world's leading specialists in the field of Inflammatory Bowel Diseases. It is structured around basic science, translational medicine and clinical sessions. Additionally, it includes oral presentations of the best abstracts of the Congress. The sessions focus on clinical practice founded on science with practical take home messages. Check out the full programme at www.ecco-ibd.eu/discover-the-programme-2023

Why submit your research to JCC?

Prompt and professional peer review

JCC publishes research that has undergone rigorous peer review, including an initial screening by one of the Editors and recommendations by independent reviewers. The average time from submission to first decision is two weeks.

Fast publication speeds

- Fast Advance Access publication of the author manuscript version within one week of acceptance making your work discoverable faster

High Impact Factor

- With its 2021 Impact Factor, which now stands at 10.020, JCC ranks highly among gastroenterology and hepatology journals

Wide dissemination

- Publishing in JCC will ensure that your article will be seen, read and cited by your research community
