

Dear ECCO Members,

What a wonderful ECCO Congress we had in Copenhagen! It was truly lovely to see everyone again in our first face-to-face Congress since 2020.

In the meantime, we have added new and exciting content on the e-Learning platform and invite you to seize the summer time to browse through the [updated the e-Library](#) with all the latest Abstracts and Presentations from the ECCO'23 Congress, and to check out a list of specially curated list recorded [Educational Courses](#).

In the previous letter, I mentioned the revamped [e-CCO Learning Platform](#). If you have not had the chance to explore it, I recommend you take a look and explore the new-look platform!

I am happy to announce that we have introduced new content on the e-Learning platform:

- The [ECCO Nurse IBD Curriculum](#) aims to create a structured e-Learning education programme, specifically tailored towards IBD Nurses, by building on the original IBD Curriculum and adapting it for IBD Nurses and connect it to the N-ECCO Consensus Statements.
- The [IBD Communication Toolbox](#) is a series of podcasts, recorded by gastroenterologists, where you can hear how IBD experts deal with questions that are commonly asked by patients. The questions and topics addressed were selected in collaboration with patient representatives, ensuring that these are IBD questions with high relevance for the patients you meet in your practice. Additionally, each podcast focusses on tips and tricks in discussing important issues in IBD with patients - this is an invaluable learning experience to expand trainees' communication toolbox.
- The [Optical Diagnosis Training to Improve Dysplasia Characterisation in IBD](#) (OPTIC-IBD) is an advanced training programme developed by Professor Marietta Iacucci and her team. This programme aims to improve your ability to endoscopically characterise colonic dysplasia and polyps in IBD patients. By completing this programme, you will be able to recognise the role of optical diagnosis, describe endoscopic lesions in IBD using validated classification systems, and improve your prediction of histology.

We also have the following new content:

## TALKING HEADS

Florian Rieder  
Crohn's & Colitis Foundation

Pascal Juillerat  
e-Learning Taskforce Ambassador

Uri Kopylov  
EduCom Member

Johan Van Limbergen  
ECCO Member

**Talking Heads**  
MRI VS. US VS. ENDOSCOPY
