

Your patient & research registry

What about IT and data security?

The database complies with the data protection and privacy EU Directives

- UR-CARE was developed following ISO 27001 and ISO 15504 certified quality technical standards for computer software development
- Centres will remain the owners of their patient data
- Personal patient data is stored separately and will only be accessible for its centre
- Sensitive information is automatically encrypted
- All data is stored on secure servers located in the EU
- Information is constantly backed up
