

Your patient &
research registry

Why should your centre use UR-CARE?

An inventory of your individual patients
to include clinically relevant data

- For capturing your patients' clinical data in an easy and comprehensive way
- Open to any health care professional working in the field of IBD
- Cost free
- User-friendly search tool allowing you to find your patients meeting certain criteria
- Only a few mandatory variables: Level of detail is up to the individual centre
- Possibility to perform studies at the centre level autonomously
