CORRIGENDUM

Corrigendum to “The second European evidence-based consensus on the diagnosis and management of Crohn's disease: Current Management” [J Crohn's & Colitis 4 (2010) 28–62]

Axel U. Dignass

The authors and publisher regret and apologise that, in the above article, the following mistake was inadvertently slipped:

On page 38, first paragraph reads:

“Methotrexate 25 mg/day (oral, subcutaneous or intramuscular injection-unlicensed for use in IBD) may be used in a similar fashion to thiopurines”.

But it should read:

“Methotrexate 25 mg/week (oral, subcutaneous or intramuscular injection-unlicensed for use in IBD) may be used in a similar fashion to thiopurines”.
